Re: **Draft Burnt Mill Pond Supplemental Sediment Sampling Report, Vineland, New Jersey**

Dear Mr. Hansen:

The Environmental Protection Agency (EPA) has completed the review of the *Draft Burnt Mill Pond Supplemental Sediment Sampling Report*, dated November 2015, prepared by TRC. We note that the results of the supplemental sediment sampling of Burnt Mill Pond were found to be below the EPA residential soil screening levels (RSLs) and the New Jersey Department of Environmental Protection hexavalent soil criterion of 20 mg/kg as well as the Site Remediation Goal of 1275 mg/kg for total chromium. EPA has no comments on the Supplemental Sampling Report.

Please finalize the document by changing Draft to Final and provide EPA with a revised copy of the Final Burnt Mill Pond Supplemental Sediment Sampling Report.

Should you have any questions or comments please do not hesitate to contact me at (212) 637-4273.

Sincerely yours,

A handwritten signature in cursive script, reading "S. D. Henry", is positioned above the typed name.
